PROFILE

Motivated Software Development student with a strong academic background and practical experience in coding, project development, and Linux system administration. Proficient in C/C++, front-end technologies, and Docker, Abdullah has experience in developing and implementing complex projects, both academically and freelance. Strong skills in algorithms and data structures, including the ability to develop, test, and deploy software solutions. Eager to learn new technologies rapidly and passionate about applying software development skills to solve real-world challenges.

WORK EXPERIENCE

Freelance Front-end Developer

2021-present

Remote

Developed university projects for clients and created websites for training purposes.

RESEARCH EXPERIENCE

- MiniShell Project: Conducted research and development to create a custom shell, exploring the intricacies of shell programming and system calls. 2023-01
- Philosophers Project: Investigated the basics of threading a process and mutexes, contributing to academic understanding in the field of concurrent programming. 2022-10

Projects

E-commerce Website
